CARDIOLOGY DIAGNOSTIC REPORT

Report ID	CARD-2026-0674	Date of Examination	2026-07-22
Patient Name	Arjun Mehta	Patient ID	CP-PT-10482
Age / Gender	32 / Male	Department	Cardiology
Referring Physician	Dr. Kavya Rao	Consultant Cardiologist	Dr. Rohan Menon, DM Cardiology

Chief Complaint

Patient presents for cardiology follow-up after lifestyle modification and medication compliance. Chest discomfort has reduced and exercise tolerance has improved.

Clinical History

Patient reports regular walking five days per week, reduced caffeine intake, and adherence to prescribed therapy. No emergency visits since previous evaluation. Mild breathlessness occurs only with heavy exertion.

Vital Signs

Parameter	Value	Reference / Comment
Blood Pressure	128/82 mmHg	Clinic reading
Heart Rate	78 bpm	beats per minute
Respiratory Rate	18 breaths/min	breaths/min
SpO2	99%	room air
Weight	78 kg	kg

ECG / Echocardiography / Cardiac Markers

Metric	Result	Unit / Scale	Clinical Note
Ejection Fraction	58	%	Improved left ventricular systolic function
Systolic BP	128	mmHg	Improved
Diastolic BP	82	mmHg	Improved
QT Interval	392	ms	Improved
QTc Interval	430	ms	Within acceptable range
PR Interval	162	ms	Within normal range
QRS Duration	90	ms	Within normal range
Troponin I	0.010	ng/mL	Within reference range
BNP	82	pg/mL	Improved
Total Cholesterol	190	mg/dL	Improved
LDL Cholesterol	112	mg/dL	Improved
HDL Cholesterol	46	mg/dL	Improved

Triglycerides	142	mg/dL	Improved
---------------	-----	-------	----------

Impression

- Blood pressure shows significant improvement compared with previous visit.
- Ejection fraction improved from mildly reduced range to near-normal range.
- BNP and lipid profile show interval improvement.
- No new evidence of acute cardiac injury.

Treatment Plan / Advice

- Continue current lifestyle measures and prescribed medications as advised.
- Continue low-salt, heart-healthy diet and regular moderate exercise.
- Repeat lipid profile and echocardiography as clinically indicated.
- Seek urgent care if severe chest pain, fainting, or severe breathlessness develops.
